DETAILED ACTION

Allowable Subject Matter

1. The following is an examiner's statement of reasons for allowance: the applicant's reply (amendment) explicitly presents reasons why the instant claims are patentable over the reference. Refer to the amendment dated 01/26/04 for additional information. In this regard, the primary reason for the allowance of the claims is premised on applicant's rebuttal arguments remarking that the major difference in the claims not found in the prior art is the specific step of continuing to pass fuel, air and steam through the bed of reforming catalyst to produce reformat and to regenerate the bed of reforming catalyst (at the same time) through either heating the bed of reforming catalyst, or modulating the fuel or air and/or steam feed rate, or adding oxygenate to the feed supplied thereto and by maintaining the hydrogen concentration above the specified percent throughout the operation of the processor. In the examiner's opinion, the instant application is now deemed to be directed to an unobvious modification over the invention patented in patents 5624964 to Cimini et al and Autenrieth et al 6432378 (note: Autenrieth et al'378 is a patent family member of the EP 884271).

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
